The supreme composition of Pancreas Kare not only helps to subside the Diabetes complications but its combination of Minerals and Vitamins reduces fatigue, energises, revitalizes and promotes a Healthy Life to a great extent. Pancreas kare- A Holistic Composition to Manage Diabetes in a simpler way!

Pharmacology:

Pterocarpus marsupium helps to reduce glucose absorption from the GIT and improve the insulin and pro-insulin levels. Agele marmelos decreases the glucose level and glycosylated haemoglobin. It also promotes the uptake of glucose by the cells. Gymnema sylvestre supports healthy glucose metabolism by mediation of insulin release and enhances health pancreas function. Momardica chirantia increases insulin sensitivity. Syzium cumini reduces blood sugar by sensitizing the pancreas to produce more insulin along with reducing the cell resistance to insulin which helps to increase glucose uptake by the cells. Tinospora cordifolia contains a variety of chemicals of which some have pronounced antioxidant activity and others might increase the activity of the body's immune system and thus acts a good vitalizer. Cinnamomum tamala produces hypoglycaemic effect along with insulin release from pancreatic Beta cells. Ficus racemosa is rich in dietary fibres and has marked hypolipidemic activity. Trigonella foenum graecum (Fenugreek) reduces the rate of glucose absorption by the intestines thereby reducing the after meals glucose peak levels. Azadirachtha indica controls the blood sugar level and also helps to prevent or delay the onset of the disease.
